(54) MIDI AND ITS OPERATING METHOD AND OPTICAL DISK FOR MIDI AND ITS RECORDING METHOD

(57)Abstract:

PURPOSE: To facilitate a desired playing data access and to quicken the access by recognizing the position of a playing file designated based on a designated playing file name and a data of a stored disk structure file onto an optical disk and reading the data of the designated playing file.

CONSTITUTION: A data of a volume descriptor of an optical disk CD-ROM is read. Since data A representing the position of a disk structure file B on the optical disk CD-ROM is included to the prescribed location, the data A representing the position is used and the disk structure file B of the optical disk CD-ROM is accessed and the disk structure file B is read and stored in a memory.

Thus, the stored disk structure file B is used to recognize the position of the designated playing file on the optical disk CD-ROM. Thus, the desired playing file access is facilitated and quickened.
